

HAZCAT® CommandCat COMMUNICATION SYSTEM

KT1044 CommandCat \$10,980.00 Plus freight

This system provides the equipment to wirelessly link the Entry Team (ET) personnel with the Technical Reference Center (TRC). The ET equipment includes a computer tablet that is touch screen enabled for ease of use with PPE. The software prompts the team in a stepwise manner that allows for no mistakes in procedures. Images taken in the Hot Zone with the microscope are transmitted wirelessly to the TRC “live time”.

The TRC includes a rugged high memory lap top computer and the HZ a Tablet Computer with touch screen. The Haztech software both saves the information, and with proper hook-up, the TRC computer can e-mail the microscope images to State, County ontract lab for a “live time” opinion. The system includes a high gain antenna and 12vdc hookup. With the software included, and your incident information entered, you will be able to generate a complete incident report using your printer. Both segments of the system are packaged in foam-lined pelican cases with built in gaskets for moisture and contamination security. All of the equipment is portable and runs on 12vdc or 110-vac rechargeable batteries.

(battery chargers are included). Comes with complete operating manual and set up procedures.
